On the former site of the large Nauen transmitter station, situated about 35 kilometers west-northwest of Berlin, a new radio transmitter station is reported to have been erected on orders of the East Zone Republic and the Occupation Power.

The installation is reported to consist of two medium-wave transmitters with a capacity of 150 kw each. Since both transmitters are identical in construction it is said to be possible to couple the two and thus to achieve a 300 kw capacity. The purpose of this arrangement is to enable the GDR to cover Berlin and all of Germany with radio transmissions from Nauen in case of an occupation by force of West Berlin and destruction of the large West Berlin transmitters (especially RIAs) resulting therefrom.
